

## DRAFT - DISCHARGE UPDATE REPORT

**Project:** Temple-Inland Bogalusa Mill  
**Project Location:** Bogalusa, Louisiana  
**Report Prepared By:** Ed Cote  
**Date:** August 29, 2011  
**Status of Report:** Complete as of 3:30 pm, August 29 pending additional samples and analyses

**Weather Conditions:** AM: fair/sunny PM: fair/sunny  
**Temperature:** Max. 97°F  
**Cloud Cover:** (Yes) (No)  
**Precipitation:** (Yes) (No)

**Discharge:**  
**Beginning Time:** 7:23 am  
**Ending Time:** 6:45 pm (Target)  
**Discharge Stoppage:** No

**Reason for Stoppage:**  
**Description:**

### Activities, Remarks:

- Discharge began at 7:23 am from the west weir at approximately 2.1 MGD flowrate
- Flow increased to 4.95 MGD with goal of discharging 2.0 MG within 12 hour period.
- Outfall monitoring was conducted in accordance with approved plan
- pH of discharge was within acceptable range
- ARCADIS assisted Temple-Inland with weir adjustments to maintain target flow

### Problems/Deficiencies/Corrective Actions:

- None

### Samples Taken / Results:

- Samples collected per frequencies indicated in Table 1 of approved Discharge Plan and results (to time indicated in above status) presented in attached table.

### Calibration Records on Field Testing Equipment

- Outfall online pH and conductivity meters calibrated by Temple-Inland
- EBS sampling meters calibrated prior to start of discharge

### Oversight/Visitors

- LDEQ representatives on site
- ISCO flow meter vendor representative
- EBS Sampling Laboratory
